1. The figures for the 2000 Census combine the results of the "Asian" and "Native Hawaiian & Other Pacific Islander" categories. Prior to 2000, these two groups were combined into a single category "Asians & Pacific Islanders".
2. The category "Other Race" indicates that the respondent wrote in a race category not included elsewhere by the Census Bureau. Prior to the 2000 Census, where persons were allowed to select two or more racial categories, persons of mixed racial heritage appear to have been more likely to select this category. Examples of persons assigned to the "Other Race" category by the 2000 Census includes those who recorded under the race category an Hispanic origin group, multiracial, mixed, Cajun, Cape Verdean or Creole.
3. Census 2000 was the first census to allow respondents to report more than one race for an individual. Due to this change in methodology, racial statistics reported from Census 2000 lack a one-to-one comparison with those reported by any previous Census.
4. Hispanic status is independent of race and reflects whether a respondent has origins in either Spain or the Spanish speaking countries of the western hemisphere. The latter include Mexico, Cuba and the Dominican Republic, as well as all Spanish speaking countries located in Central America and South America.
